Profile Award-winning Product Designer with 12+ years of experience crafting elegant interfaces for web, iOS, and desktop platforms. Proven expertise in interaction design, visual design, and end-to-end UX for large-scale content management systems, internal tools, and consumer-facing products. Skilled cross-functional collaborator with a passion for human interface design, high-fidelity prototyping, and delivering polished experiences with meticulous attention to detail.

Experience	Director: UX / Creative Experis 2025–current	I lead product design for complex internal tools and content management systems, translating dense workflows into elegant web and desktop interfaces. Partnering with cross-functional stakeholders—engineering, product, and leadership—I deliver interaction specifications, high-fidelity prototypes, and scalable design systems under tight deadlines.
	Sr. Product Designer Divisions MG 2024–2025	I led UX and product design for large-scale facility management tools, creating wireframes, high-fidelity comps, and interactive prototypes in Figma. Collaborated closely with engineers and product managers to document design specifications and QA the implemented product across web and desktop.
	Creative Director Cruz Foam 2018–2024	As Creative Director, I built the brand from scratch—leading visual design, interaction design, and product strategy. I scaled the design team, managed multiple complex projects simultaneously, and delivered compelling presentations and storytelling that supported \$35M in fundraising. Work recognized by Time, Fast Company, and Penta.
	Sr. Designer Tesla 2012–2018	Product Designer and engineer focused on human interface design for next-generation vehicle systems. Delivered high-fidelity prototypes and visual design solutions across iOS and desktop platforms, collaborating with cross-functional stakeholders to drive innovation at scale with rigorous attention to detail.
	Founder / Owner Timber 2017–current	Founded and designed the complete product experience—from content creation and publishing workflows to brand identity and visual design. Built a custom web-based product configurator, managed all design deliverables independently, and drove brand storytelling through motion, video, and presentations.
	Sr. Designer (contract) Orange Charger 2018	Hired to redesign Orange Charger's visual identity and trade show presence, I created cohesive design systems, high-fidelity comps, 3D rendered assets, and motion graphics—delivering polished design specifications that elevated the company's visibility with partners and investors.
	Design Advisor FINDS.ai 2024–current	I shape early-stage product design and brand direction through interactive Figma prototypes and investor presentations. I align UX strategy with visual storytelling to support traction and fundraising.

Awards	Time Magazine	Invention of the year - Cruz Foam: 2023
	Fast Company	Most innovative companies of the year - Cruz Foam: 2024
	Penta Awards	Shortlist and bronze medal winner - Cruz Foam: 2023

Education **University of Oregon**
BS, product design & material studies
2006–2012

Skills	Tools	Product / Strategy	Creative	Other
	Figma	Design leadership	Interaction design	3D rendering
	Sketch	Agile product dev	Visual design	Wireframing
	Adobe CC	Design thinking	Design systems	High-fidelity comps
	Keynote	User research	UI/UX design	QA review
	Photoshop	Problem solving	Motion graphics	Presentation design
	Prototyping tools	Cross-functional collaboration	Design specifications	Storytelling
